H4 CHARACTER

Calm investigator. Organic silhouette. Evidence signal.

The asymmetrical crown, bowed brim, connected observer frames, detached evidence wedge, and supplied wordmark are the H4 signature.

Production SVGs contain self-contained vector geometry - no fonts, embedded raster images, scripts, binary, circuitry, or decorative dots.

One identity, three purpose-built constructions.

Each master is redrawn for its size range. Small variants are not shrunken copies of the full mark.

GOLDEN-RATIO POLICY

The supplied H4 independently measures 1.619 for brim width / crown width, closely matching the 1.618 hypothesis.

No other dimension is forced into phi. The supplied contours and optical character remain the higher authority.

NON-NEGOTIABLES

- Keep lowercase c, uppercase V, and both diacritics.
- Never join, move, recolor, or decorate the evidence wedge.
- Use one-color art for stamping, engraving, and embroidery.
- Do not stretch, tilt, glow, outline, or redraw the master.
